Other Benefits

- **Surrender Value / Paid-Up Value**

The policy acquires paid-up value (PUV) and/or surrender value only if atleast first two consecutive years premiums have been paid in full.

Paid-up sum assured on death will be calculated by multiplying sum assured on death with the ratio of the number of premiums paid to the total number of premiums actually payable as per the term chosen at inception of the policy. Paid-up sum assured on maturity will be calculated by multiplying basic sum assured with the ratio of the number of premiums paid to the total number of premiums actually payable as per the term chosen at inception of the policy.

The Paid-up Sum Assured on death or maturity, as applicable, along with the vested bonuses and terminal bonus, if declared will be called the Paid-up Value on death or maturity. If the policy is not subsequently revived, benefits based on the paid-up value will be paid on maturity or earlier death of the life assured. A paid-up policy will not participate in any subsequent distribution of profits.

You may terminate a paid-up policy before maturity by surrendering the policy during the policy term for a surrender value.

The Guaranteed Surrender Value (GSV) will be equal to GSV factors multiplied by the total premiums paid plus surrender value of vested bonus, if declared.

The GSV factors for various policy durations are given below:

Policy Year	As percentage of total premiums paid		
	Policy term of 7 years	Policy term of 12 years	Policy term of 15 years
1	0%	0%	0%
2	30%	30%	30%
3	35%	35%	35%
4-5	50%	50%	50%
6-7	90%	50%	50%
8	Not Applicable	60%	56%
9	Not Applicable	70%	62%
10	Not Applicable	80%	68%
11	Not Applicable	90%	74%
12	Not Applicable	90%	79%
13	Not Applicable	Not Applicable	85%
14-15	Not Applicable	Not Applicable	90%

Surrender value of bonus is calculated by multiplying the vested bonus, if declared with factors based on outstanding term to maturity.

The Non-Guaranteed (Special) Surrender Value (SSV) will be based on assessment of past financial and demographic experience of the product / group of similar products and likely future experience and will be reviewed from time to time depending on changes in internal and external experience and likely future experience. The special surrender value will be arrived at, by multiplying Paid-up value on maturity with SSV factors.

On surrender, higher of the Non-Guaranteed SSV and the GSV will be paid.

In case of death during the payout period, all future payouts will continue to be paid to the nominee or legal heir.

You have an option to receive maturity benefit in a lump sum. The maturity benefit in this case would be 110% of paid-up sum assured on maturity plus vested reversionary bonuses plus terminal bonus, if declared, at maturity.

Non-Disclosure

Extract of Section 45, as amended from time to time, states:

No policy of life insurance shall be called in question on any ground whatsoever after the expiry of three years from the date of the policy. A policy of life insurance may be called in question at any time within three years from the date of the policy, on the ground of fraud or on the ground that any statement of or suppression of a fact material to the expectancy of the life of the insured was incorrectly made in the proposal or other document on the basis of which the policy was issued or revived or rider issued.
